

Coin Whisperer Auto Trading

General info on how & when did CW get created?

In June of 2018 CryptoInfo2017 and Bigrichardo, both had their own groups/channels where they were making a difference from their signals/calls. With CryptoInfo and Bigrichardo aspiring for much more and with their paths aligning they knew instantly the best thing for Crypto was for them to join forces, partner up and make a major difference in this Space! CryptoInfo and Bigrichardo wanted to “break the wheel” and change what the “normal/average” telegram channel/group was doing and create the #1 channel in Crypto not just for signals but to create and grow a Family!

The Whisperer Channels started with a Premium group with a 24-7 chat where powerful signals are posted with short, mid and long term durations. In January 2019 a Breakout channel with a 24-7 chat was added! CryptoInfo was testing Breakout calls within the Premium Channel and Chat for a couple of months, to gauge the interest of the members for making very fast profit!

What is the Difference between Premium Signal Channel and our Breakout Channel?

Well to be honest neither channel is better than the other! With our breakout channel you have to be able to monitor the signals given for longer stretches of time. The signals have a much shorter time frame (0-3 days). What is a breakout? A “Breakout” is where we're buying the breakout of the coin when it's just about to crack resistance and make a run for fast profit! This is done by monitoring the entire Crypto Market just about 24/7 by our TA specialist CryptoInfo2017. Selling at the targets to make fast profit and move onto the next signal. Breakouts could be a bit more risky than premium in case of a rejection, but high percentages of the signals are very fast profits.

Premium on the other hand has more time to develop and is based on insider news, TA and other technical/fundamental factors. You will gain the most percentage profit per signal from premium! What it comes down to and is heavily dependent upon is how much time you have to trade per day. Neither is better than the other, but they both are absolutely Amazing!

What do you need?

- Subscription at **Breakout** and/or **Premium**. Or just enjoy the free signals.
- Subscription at 3commas: Sign up with **20% discount**: 3commas.io/?c=coinwhisperer
Cheapest subscription will be enough, we won't be using “bots” in 3commas
- Subscription for our Auto Trading bot. Free to use when your portfolio is lower than \$750.
- Talk to our [service bot](#). You can see your membership details & create your own referral.
- Talk to our [auto trading bot](#). Here you can setup your auto trading.

What we will say when you ask:

- What subscription should I take if I have 0.20 BTC for auto trading?
Beginner will be a good one to start! Enter each signal with 0.01 BTC.
- What subscription should I take if I have 0.50 BTC for auto trading?
Advanced will be a good one to start! Enter each signal with 0.02 BTC.
- What subscription should I take if I have 0.75 BTC for auto trading?
Pro will be a good one to start! Enter each signal with 0.03 BTC.

If you have a higher volume than 0.75 BTC you will know what to do. 😊

Coin Whisperer Auto Trading

How does the bot work?

We created a special connection with 3commas where we auto create **Smart Trades**. Their “Marketplace” only works with “bots” that only support “Buy” and “Sell” command. No trailing profit taking, no trailing stop loss. Smart Trades covers all that and above all; you only need the cheapest subscription at 3commas. 😊

At each Smart Trade we will set the Buy in price, targets, Stop Loss and turn on Profit Taking.

Smart Trade created with Trailing Stop Loss

Smart Trade hit T1 & moved up SL to Buy in

Subscriptions

Membership	Max BTC / trade	Subscription / month	Subscription / 6months
<i>Bronze</i>	0.01BTC / trade	0.005 BTC / month	0.02 BTC / 6months
<i>Silver</i>	0.02BTC / trade	0.01 BTC / month	0.04 BTC / 6months
<i>Gold</i>	0.05BTC / trade	0.03 BTC / month	0.12 BTC / 6months
<i>Platinum</i>	0.10BTC / trade	0.05 BTC / month	0.20 BTC / 6months
<i>Diamond</i>	0.50BTC / trade	0.12 BTC / month	0.48 BTC / 6months
<i>Double Diamond</i>	Unlimited	0.30 BTC / month	1.20 BTC / 6months

Coin Whisperer Auto Trading

Profitable News Signals

We created a method to calculate Profitable News. Each cryptocurrency project post messages about their new developments on Twitter. These tweets can contain news that can start a price jump, or a can start a (slow) movement up. Profitable News is what we are looking for!

As a base filter we collect all tweets of all top 300 cryptocurrency projects. Of all those tweets we try to collect the best ones that could give us the most profits.

When this tweet is marked as “Featured” then it will be posted at [CW™ Profitable Crypto News](#). At the same time this will be optional to buy when you turn on the specific auto trader feature for the profitable news signals.

Specific commands

- autotrading_news_activate - Start auto trading Profitable News
- autotrading_news_deactivate - Stop auto trading Profitable News
- set_news_trade_amount - Type `"/set_news_trade_amount 0.01"` if you want to spend 0.01 BTC on every smart trade

Bot settings

Description	Setting
Target profit taking	2%
Stop Loss	2%
Trailing profit taking	On
Trailing Stop Loss	On
Minimum coin value	0.00000100 BTC

Price details

Auto trading on the “Profitable News Signals” is available with an auto trading subscription. You **don't** need an **extra** subscription.

Coin Whisperer Auto Trading

Step-by-step guide to hook up to the bot

Basics

1. Sign up at 3commas with 20% extra deposit: 3commas.io/?c=coinwhisperer
2. Send your payment to 3PNbYwo6cijd1cz9pxGjPsLFjjGQanKhhk (including withdraw fee)
3. Send your txid to [Bigrichardo](#)
4. Create an API key at 3commas, go to [API] in 3commas and choose [+ New API access token]:

5. In the new screen type a name for your API key, in our example we use “Coin Whisperer Auto Trading”:

6. Now past the API Key **and** Secretkey in a textfile (for example: notepad)

Coin Whisperer Auto Trading

Setup the auto trading bot

In the previous step you created the API key at 3commas. You need this to hook up your 3commas account to our auto trading bot:

1. Talk to our [auto trading bot](#) (this is a link). Here you can setup your auto trading.
2. Use the command `/setkey` to add the keys to the bot. It is very important to split the keys with a space or else the bot won't recognize the keys. Type `/setkey apikey secretkey`:

3. If everything went like we planned you will receive a message: *Your API key is XXXX, for safety reasons your secret key isn't being send back to you. Your account seems to be ready!*
4. Use command `/autotrading_status` to check you auto trading status any time!
5. Use command `/set_trade_amount` to set an amount that you want to spend on each signal. When you want to trade with 0.02 BTC per signal you'll need to type: `/set_trade_amount 0.02`
6. Use command `/set_total_trade_amount` to set the max amount of balance you want to use for auto trading. When you want to trade with 0.50 BTC you'll need to type: `/set_total_trade_amount 0.50` or `/set_total_trade_amount_unlimited` to have no limit.
7. When you want to **de-activate** the bot you can use the command `/autotrading_deactivate`. It won't panic sell all your signals, it will only stop the new signals coming in your account.
8. When you want to **activate** the bot you can use the command `/autotrading_activate`.

Coin Whisperer Auto Trading

Default settings for the auto trading bot

At first the bot has the following default settings to get you started, but you can change all these settings to create your own **strategy**:

#	Setting	Beginner
1	Trade amount per signal	0.01 BTC
2	Total trade amount	Unlimited
3	Stop loss	Move up to buy in when t1 hits
4	Target sell volume	T1=45%, T2=25%, T3=15%, T4=15%, T5=0%
5	Trading on terms only	Short/Short-mid
6	Trade on .. signals	Free, Breakout & Premium
7	Disabled exchanges	None
8	Participate in Global Panic Sell	No

Custom settings for the auto trading bot

Autotrading

- help - Get a list of commands
- autotrading_status - Get status of autotrading
- autotrading_activate - Start auto trading
- autotrading_deactivate - Stop auto trading
- get_report_on_trades - Get report on auto trade performancesmart_trade_history - Get most recent smart trades at 3commas
- connected_exchanges - Get exchange info connected to 3commas

Signal settings

- setkey - Type "setkey api_key secret_key" (spaces between keys are important!)
- set_total_trade_amount - Type "/set_total_trade_amount 0.5" to set a max of 0.5 BTC in autotrading
- set_total_trade_amount_unlimited - Type "/set_total_trade_amount_unlimited" to set no max on autotrading
- set_trade_amount - Type "/set_trade_amount 0.01" if you want to spend 0.01 BTC on every smart trade
- set_targets_volumes - Type "/set_targets 45 25 15 15 0" if you want every trade to have 4 targets
- short_term_trading_only - Trade signals only on short term
- short_to_long_term_trading - Trade signals on all terms
- breakout_signals_only - Trade only with Breakout signals
- premium_signals_only - Trade only with Premium signals
- trade_on_all_signals - Trade on all signals
- exclude_ticker - Type "/exclude_ticker TRX;ETH" if you want to exclude TRX and ETH from Auto trading
- exclude_ticker_remove - Type "/exclude_ticker_remove" if you want to trade on all tickers

Group Panic sell

- enable_group_panic sell - Let CW panic sell your auto traded signals
- disable_group_panic sell - Don't allow to panic sell for me

Stop loss

- trailing_stoploss_activate - Activate trailing stoploss
- trailing_stoploss_deactivate - When 1st target hit, up SL to buy in.
- changing_stoploss_deactivate - SL doesn't change.

Exchange settings

- set_binance_on_3commas - Type "/set_binance_on_3commas btrading" if you named your Binance account "btrading" in 3commas
- set_bittrex_on_3commas - Type "/set_bittrex_on_3commas btrading" if you named your Bittrex account "btrading" in 3commas
- set_kucoin_on_3commas - Type "/set_kucoin_on_3commas ktrading" if you named your KuCoin account "ktrading" in 3commas
- disable_binance_on_3commas - Disable autotrading on Binance
- disable_bittrex_on_3commas - Disable autotrading on Bittrex
- disable_kucoin_on_3commas - Disable autotrading on KuCoin
